

# MANUFLEX

THE NEW GENERATION  
8 COLOUR GEARLESS C.I.FLEXO PRINTING PRESS

**MANUFACTURED BY MANUGRAPH IN INDIA  
IN COLLABORATION WITH CARRARO S.R.L, ITALY**

## ABOUT THE COMPANY

Manugraph India Ltd. was established in the year 1972 and is India's largest manufacturer of web offset presses for the newspaper and book printing industry. It was the first Indian company to have exported "Made in India" printing machines as early as 1994-95 to advanced countries like Germany, France, UK & USA. The company today, holds the distinction of being the World's largest producer of Single width presses with installations across India, Asia, Africa, Middle East, Europe, CIS countries, Australia, North & South America.

Manugraph recently diversified into the flexible packaging industry & has manufactured the first C.I.flexo press in India, in collaboration with Carraro S.R.L, Italy. The press has been manufactured at Manugraph's sprawling state-of-the-art facility in Kolhapur which is spread over 1,38,000 sq.meters, having separate divisions with ultra-modern facilities like Quality, Design, Development, Production, Installation & Servicing.

*Kolhapur Factory*

## *STABILITY*

The collaboration between Manugraph and Carraro will feature Carraro's long standing experience in mechanical and electronic sturdiness, versatility and easy handling, together with Manugraph's detail for quality, precision and world class engineering.

## *BEST QUALITY STANDARDS*

Manugraph follows a strict Quality Management System at the Kolhapur factory in accordance with ISO 9001:2015 standards, with the most advanced production systems and technologies. Environmental friendly policies are also followed by way of reduction of wastes, recycling, reducing emissions, environment up-gradation and energy efficiency.

## *SERVICE SUPPORT & NETWORK*

Manugraph has trained and experienced service staff available to engage in any mechanical or technical situations. The company also has an extensive network of offices in India, UAE and Africa to attend to customer needs.

## *THE FUTURE OF FLEXO*

In the past few years flexographic printing has reached very high standards in terms of quality, highly comparable to rotogravure. Additionally with the new generation of HD polymer plates incredible results have been achieved.

## *YOU THINK IT..... WE CAN DO IT*

### **Some Example of materials which can be printed.**

- Polyethylene (PE)
- High Density Polyethylene (HDPE)
- Low Density Polyethylene (LD PE)
- Polypropylene (PP)
- Biaxially oriented polypropylene (BOPP)
- Polyvinyl chloride (PVC)
- Polyethylene terephthalate (PET)
- Paper
- Aluminium
- Breathable (material for diapers for children)
- Non-woven fabric (TNT)
- All materials that are available in reels

## SOME FIELDS OF APPLICATION

- Food industry (packaging of chips, crackers, snacks, water bottles or labels of soft drinks, yogurt covers, packages of mozzarella cheese, trays of meat products or milk products, everything that comes packed with plastic film or coupled products film and aluminum)
