Ecoflex VSi Servo (S2)

VSi Servo (S2) has dual servo motors per print station and is equipped with pre-register and auto-register* capabilities. Print units have a separate chilled drum for enhancing print gloss levels, short web path, quick change print and anilox & HMI on each station.

- Main Features**
- 2 Servo drives per print unit
 - HMI at every station
 - Separate chilled drum
 - Short web path
 - Electronic pre-register and auto-register*
 - Open access design for quick change of print roll & anilox

Ecoflex VSi Servo

Ecoflex VSi Servo press is an all station machine with pre-register and auto-register* capabilities. Print units have chilled impression drums with UV, short web path, quick change print rolls & HMI for all operations & settings. Zerobreak diecut technology ensures high speed matrix removal for complex shapes.

- Main Features**
- All Servo drive
 - HMI at every station
 - Open access design for quick change of print roll & anilox
 - Chilled impression drums with UV
 - Rail system for host of accessories
 - Very low wastage between job changes
 - Short web path

Ecoflex VSi

Ecoflex VSi has infeed & outfeed servo. Print units have chilled impression drums with UV, short web path, quick change print rolls. Zerobreak diecut technology ensures high speed matrix removal for complex shapes.

- Main Features**
- Infeed & Outfeed Servo drive
 - Chilled impression drums with UV
 - Rail system for host of accessories
 - Very low wastage between job changes
 - Short web path
 - Open access design for quick change of print roll & anilox

MODEL	DRIVE	SUBSTRATES	REGISTER
Ecoflex VSi Servo (S2)	Full Servo (Twin servo per print station)	From 25 microns film to 320 GSM light carton	Electronic pre-register / Final register through HMI
Ecoflex VSi Servo	Full Servo (One servo per print station)	From 25 microns film to 320 GSM light carton	Electronic pre-register / Final register through HMI
Ecoflex VSi	Infeed Outfeed Servo	From 25 microns film to 320 GSM light carton	Laser pre-register Final - 360° through knob
Ecosmart Servo	Full Servo (One servo per print station)	PS Labels, Paper 30 GSM- 280 GSM	Electronic pre-register Final - 360° through HMI
Ecosmart	Infeed Outfeed Servo	PS Labels, Paper 30 GSM- 280 GSM	360° through knob
Ecoflex	Mechanical	PS Labels, Paper 30 GSM- 280 GSM	360° through knob

Ecosmart Servo

Ecosmart Servo is a full servo press for producing labels of every kind. It is aimed at the label printer who wants the convenience of a servo press but does not need chilled drums.

- Main Features**
- Full Servo
 - HMI at every station
 - Short web path
 - Electronic pre-register
 - Small footprint
 - Open access design for quick change of print roll & anilox

Ecosmart

Ecosmart is a modern machine for the label printer. It is equipped with infeed and outfeed servo, short web path, quick change print rolls. Zerobreak lite* diecut technology ensures high speed matrix removal of complex shapes.

- Main Features**
- Infeed & Outfeed Servo drive
 - Small footprint
 - Rail system for host of accessories
 - Short web path
 - Very low wastage between job changes
 - Open access design for quick change of print roll & anilox

Ecoflex

Ecoflex is designed to help the label printer to take on new markets and more demanding jobs. Its modular design and precise, rigid construction provide the versatility and reliability necessary for the most difficult jobs.

- Main Features**
- Closed loop tension control
 - Easy removal of print & anilox rolls
 - Small footprint
 - Rail system for host of accessories
 - Low wastage between job changes

All Presses include : Solid dual frame all steel construction, Pneumatic reel lift , Ultrasonic web guide, Electronic Tension control, HMI for various settings
